Why choose Airparx

- » One of Europe's biggest leisure manufacturers offering a complete FEC solution
- » Fantastic value for money: with our own in-house team an important layer of costs is eradicated
- » The first company ever to produce an inflatable park
- » Superior quality and design
- » Safety as standard
- » Maintenance and backup service: our team will keep your park in top condition
- » Consultancy and customer service before, during, and after – which is second to none
- » Worldwide delivery

We are the complete solution that you need

"I have worked with Airparx and found them to be extremely helpful, and competitive in prices. Their equipment is outstanding and I have never had any reasons to call them with faults of any type. The customer service is outstanding and I can highly recommend them to any customer."

*Dean McGuire, Best Trampoline Park Winner 2019,
The Adventure Awards*

About Us

Airparx is part of the Airquee group, one of the longest established commercial leisure equipment manufacturers in the world. Our roots extend back to the 1980's and our global growth has reached every continent – we are the original creators of the world's first inflatable park, and the market leaders in the supply and installation of Family Entertainment Centre equipment.

We are one of the only in-house design, development, manufacture, sales and aftercare FEC companies in the world. We rarely subcontract, preferring to maintain tight control of project management in-house.

We don't favour one element over any other – we use our experience to create the best combined areas to offer you the best chance to maximise revenues. Whatever your next exciting leisure project may be, just contact our team today – Airparx is the complete solution that you need.

The Team

Our team is second-to-none when it comes to understanding the active entertainment industry. Their knowledge of the latest trends is incredibly valuable to any customer considering opening up a trampoline park, inflatable park or family entertainment centre.

Our involvement in the leisure sector for over 30 years means we have specialist members of staff who can help you define a business plan with the right mix of products and best operational provision. We can hold your hand through the entire process.

The Factory

We are proud to operate our own factory in Romania, which is the largest in Europe, occupying 17,000 m² (approx. 180,000 ft²). Our factory caters for our carpentry work, metal engineering and fabrication, PVC stitching, drop stitch assembly and PVC welded manufacturing.

Our large manufacturing operation with accompanying design, quality control and administrative staff allows us to create new ideas, adjust to current trends quickly, and offer only the highest levels of service, product quality, and standards within the family entertainment industry, with competitive prices.

We are not aware of another company in the world that can lay claim to such an extensive and competent manufacturing facility in the industry. We are proud to introduce it and will gladly welcome you to it.

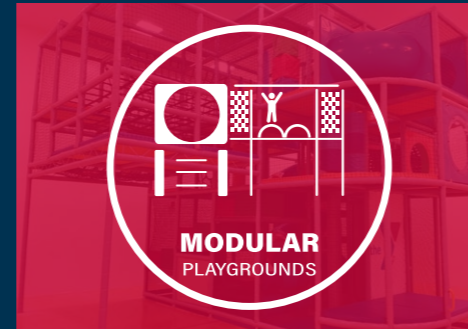

“The level of attention to detail and product knowledge is second to none.”

*Nathan Maguire,
Les Ormes Sports Development Manager*

Main Products

Airparx offers an exciting portfolio of products: all the key and on trend active entertainment attractions that can be combined to create market leading, fun, and engaging Family Entertainment Centres.

DESIGN

Airparx controls the entire design process. We have 25 designers in the UK and our factory in Romania with world-class knowledge in the design of inflatable parks and Family Entertainment Centres.

MANUFACTURE

Owning the biggest leisure manufacturing facility in Europe gives us control over the entire process, and unlike most importers, we are able to guarantee excellent quality every time.

INSTALLATION

Our fully trained staff also install our products on site. Their intricate knowledge of design and manufacture means we can be fast and efficient, saving you money and getting you operational faster.

TRAINING

Our team provides excellent training to your staff. We ensure they are well placed and fully trained on how to operate all products we manufacture and install, safely and effectively.

MAINTENANCE

Airparx have an unrivalled reputation for customer service and back up. Our large infrastructure and highly skilled staff means we can react and offer back up service quickly. This helps you keep operational longer with minimal downtime.

INFLATABLE PARKS

Investment in Family Entertainment Centres across the globe keeps on increasing and inflatable parks are one of the most popular new features for any site.

We have been market leaders in the inflatable industry for over 20 years for a reason: everything we design and manufacture is built to the highest standard and where applicable is EN14960 compliant. There is no company better placed to create your custom-made inflatable park that will fit perfectly into your indoor space.

With a wide variety of activities that can be enjoyed by the whole family, our parks offer a unique selling point that can help maximise income from your indoor space.

We can create a park to fill your entire space or combine it with our other exciting activities like trampolines, climbing walls, or even ninja courses.

TRAMPOLINE PARKS

We are a leading global trampoline park manufacturer, having designed and built 50+ parks worldwide. We provide first-class, safe, and innovative trampoline parks and family entertainment centres, delivered on time and within budget.

Airparx are accredited suppliers to ASTM and BSI PAS 5000: 2017 which is the only accreditation satisfying the British Standard and helps form the basis of the European Standard waiting to be launched.

Our designers will work with you to design a Trampoline Park which will include the latest features to help make yours unique - incorporating the newest ideas and keeping your customers returning time after time.

We offer a variety of popular features, including Interactive Sports Pitches, Tumble Tracks, Basketball Courts, Dodge Ball Arenas, Airbags, Interactive Cardio Walls, Jump Towers and Foam Pits.

CLIMB

CLIMBING WALLS

Fun Climbing is at the forefront of a new generation of indoor adventure structures. This new and innovative product provides both an exhilarating form of climbing adventure as well as a healthy full body workout for all users.

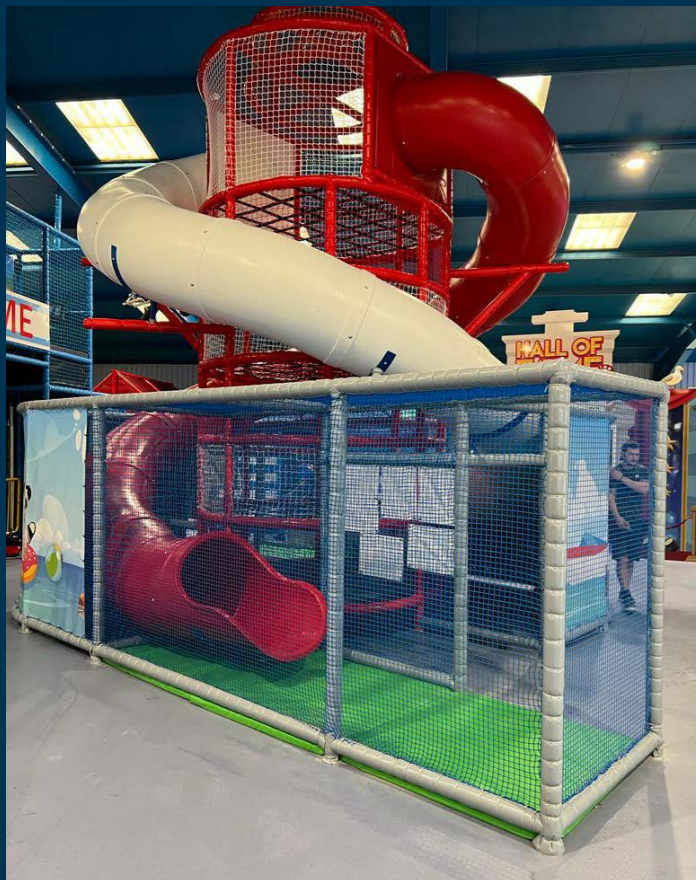

The product itself is extremely versatile, each wall capable of being tailored to meet specific customer needs. Each wall is designed and themed individually to create a memorable experience while working within a customer's specific brand.

Our climbing walls are manufactured and engineered using a modular system that allows easier installation on-site and within complex spaces and facilities. We work closely with climbing professionals and test our walls to meet the European Standard EN12572: 2017.

If you're looking for a versatile experience which can work with an existing attraction, Fun Climbing is a perfect fit.

WALLS

PLAYC

INDOOR PLAYGROUNDS AND SOFT PLAY

Our passion is to design, manufacture and install custom designed, combination or stand-alone soft play and multi-level play structures suited to your vision, needs and budget – suitable for children 2-12 years old.

We believe age-appropriate play experiences are critical to healthy child development as well as for the success of any indoor playground.

Our superior quality design, materials and manufacturing methods mean that our soft play shapes are the first choice for high-traffic areas such as gyms, cruise ships, schools and other high volume and attendance establishments.

Whether you'd like to repurpose an existing space or add a play structure to your venue, we'll work closely with you to produce an outstanding play environment that will delight children.

SOFT

NINJA

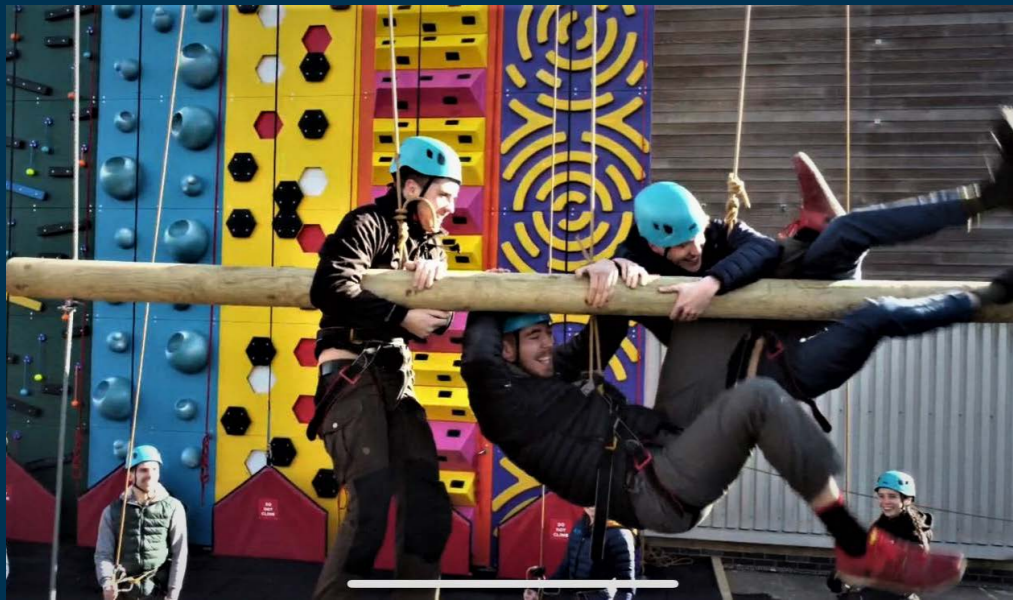

OBSTACLE COURSES

Ninja Obstacle Courses are a perfect addition that bring the WOW factor to any established leisure or family entertainment facility. They significantly enhance customer experience by providing challenging environments that keep people of all ages coming back time and time again.

Our designers use experience from many different sporting backgrounds such as climbing, parkour and free running to create the best courses.

Our latest product innovation – the Air Ninja, fuses the physical challenge of ninja courses with the fun of inflatables. This unique and seamless link between both fixed structure and inflatable technologies provides a fun, safe, and sophisticated feature that can either stand-alone or co-join with the rest of your park.

ROPE COURSES

We can help develop unique and engaging experiences that will test your balance and your nerve. When you add a rope course to your FEC you take all the fun and excitement of the forest and turn it into an all-year-round feature without the drawback of weather-related cancellations.

Our rope courses are fully customisable in colours and styles and we are extremely flexible when it comes to adding new features to your aerial adventures.

All of our courses comply with European Ropes Course Standard EN 15567 and come with a 5 year guarantee.

High in the roof space or low courses on the ground have a huge draw for birthday parties, families, school groups, and corporate teambuilding. We have a wide selection of unique obstacles and traverses that will take your FEC offering to new heights!

ADD

ADD ON FEATURES

Airparx design and manufacture a variety of add on products that can be perfectly and easily retrofitted to your Trampoline Park, Inflatable Park, or Family Entertainment Centre. Most of them have low installation costs and can be fitted without any major alteration to your existing equipment if you have some relatively small areas of free space.

They improve customer experience and increase dwell time, and also help turn one-dimensional parks into multi-activity offerings or FEC.

Add on features are the best way to improve your park without the need for a huge investment and keep your customers coming back for more.

FEATURES

Bounce Valley

CASE STUDY

Bounce Valley is a key partner to Airparx in the Benelux region and together, we have achieved an aggressive rollout of inflatable park franchises and corporately owned facilities in the region. Airparx were approached by Bounce Valley to assist them following their evaluation of the most reliable and high-quality inflatable parks in Europe and the rest of the world.

Bounce Valley parks are currently located in Enschede, Zoetermeer, Rotterdam and Breda with plans already agreed and scheduled to increase by 3 more parks in the coming twelve months.

Airparx continues to work closely with the leading management and board of directors at Bounce Valley to help develop the new cutting edge and exciting brand of inflatable parks by offering service and design support. With a consultative and two-way input from both sides, Airparx will help Bounce Valley stay at the forefront of the FEC market in Benelux and beyond as they implement their growth plans.

Bounce Valley parks are built on the premise of maximising occupancy and providing maximum fun in as much of the space as possible. They include an array of climbs, slides, obstacle and interactive games, with one site stretching across two floors, perfectly joined by a slide.

We look forward to being part of the aggressive growth plans with Bounce Valley.

Jump In

CASE STUDY

The Airparx relationship started with Jump In back in 2017 through our supply of the Last One Standing product as an add on product to a number of their multiple sites. We started with Shrewsbury, Camberley and Enfield, and we continued to support Jump In with repair and maintenance support ranging from inspections to general trampoline park procurement.

In early 2021 Airparx were commissioned to design, and manufacture Jump In's New Flag Ship site in Esher. Some of the activities included twenty lines of climbing walls, a trampoline park, dodgeball, airbags and multilevel jump towers, drop slides, a fully merged inflatable park and a soft play area.

After an award-winning opening, Airparx continued the support to Jump In by working with them to upgrade and improve the parks with our popular add on features, ranging from soft play areas, mini-inflatable parks in Warwick and UV repadding in Camberley.

In the post-pandemic era, Airparx continues to work closely with the founders and senior management team to help develop the new breed of adventure parks by offering service and design support. With a consultative and mutually engaging input from both sides, Airparx will help Jump In stay at the forefront of the FEC market in their chosen regions.
